Releases & validation

Simon George & Ricardo Goncalo Royal Holloway University of London

HLT UK – RAL – 13 July 2009

Point 1 schedule

Release schedule

- 15.3.0 Wed 24 June
 - For MC09 digitization and reconstruction
 - Tag submission deadline Thu 18 Jun 21:00
 - Critical item for trigger: menus and bug fixes
 - Bug fixes go to AtlasProduction cache
- 15.4.0 Wed 22 July
 - For ATLAS turn-on (Sept)
 - tag submission deadline Thu 16 Jul 21:00
 - Must have trigger deliverables for online use in this release
 - LCG externals change so sync with new TDAQ release (end July)
 - Bug fixes go to AtlaP1HLT and AtlasTier0 caches
- Post 15.4.0 ?
 - Series of caches and bug fix releases
 - Expect new features for analysis, detectors and monitoring
 - Plan to limit trigger to real bug fixes in cache, plus valuable enhancements via bugfix rels (to be discussed)
 - Rel & val work will switch focus to cache & bugfix rels
 - Mid to long term plans for dev releases during data taking not yet formulated.

15.3.0 status

- MC09 trigger menu being finalised for 15.3.0.2
 Semple A and enhanced bigs runs to validate
 - Sample A and enhanced bias runs to validate
- Slice performance validation to be done
- Open bugs affecting 're-run hypotheses' and 'HLTResult slimming' functionality
- AOD size issue see Fabrizio's report

15.4.0 status - selected outstanding deliverables

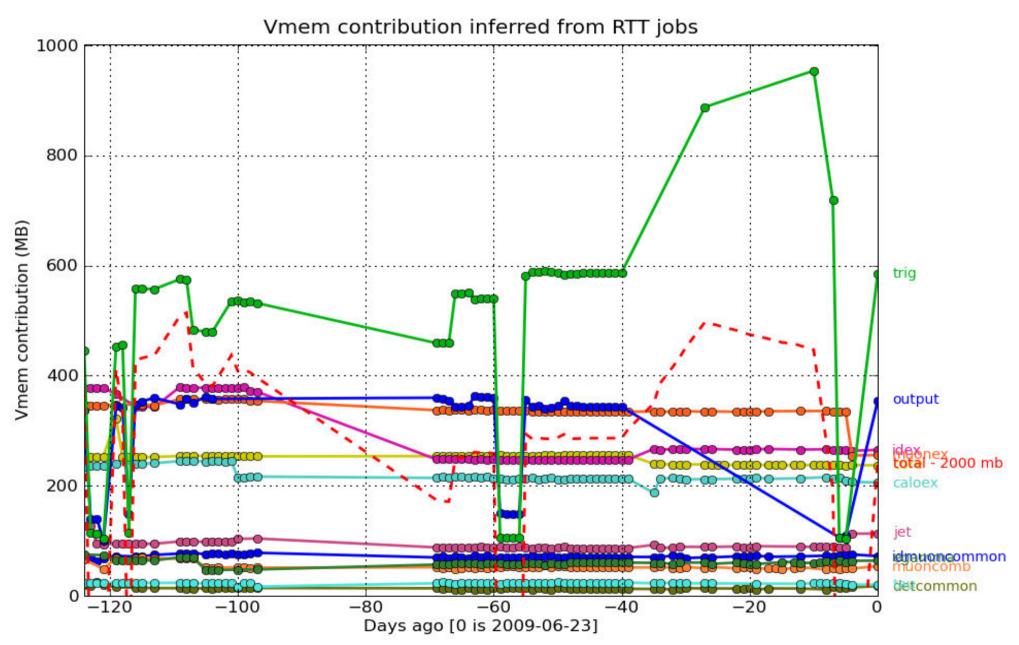

T2 MC Menus uploaded to DB and distributed with release (core) B1 P. Bell

T3b Timeout handling inside algorithms (calo,id,muon) B1 calo,id,muon

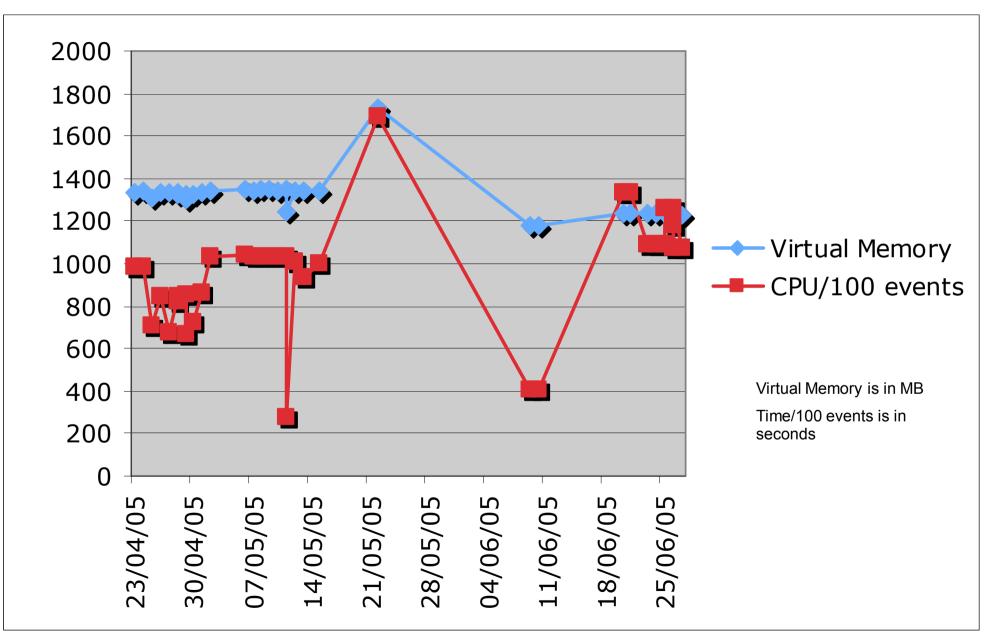

- T8b Algorithms able to modify response to missing data modified based on DetMask? (i.e. which detectors are being read out in a run) (all slices) B1 Slices
- T10a Monitoring tailored for Cosmic running (histogram ranges, ref. histos, DQ checks) (monitoring+all slices) B1 slices
- T10b Monitoring tailored for Single Beam (monitoring+all slices) B2 slices
- T10c Monitoring tailored for Early collisions & Stable running (monitoring+all slices) B3 slices
- T11 Tier0 monitoring comparing offline and HLT quantities (all slices) B2 slices
- T12 CAF monitoring in place (all slices) B3 slices
- T13b Algorithms automatically configured for Solenoid and Torroid field settings (ID done, Muon) B2 Oh
- T14 Completed definition of Trigger content in DPD (EDM) B3 Salvatore
- T15 Changes to follow Muon Review recommendations (muon) B2 Oh
- T16a Minor EDM changes (ID) [Cat. B] B1 Emeliyanov (done pending tests)
- T16c Minor EDM changes (Electron) [Cat. B] B1 Goncalo (done pending tests)
- T21d Migration of all TrigDecisionTool trigger clients B3 Slices
- T22 Serializer extended to handle top level persistent class evolution (EDM) B1 Masik (done pending tests)
- T23 ntuples can be written to single or multiple files configured by TriggerJobOpts? & tested with tier0 production script B3 Slices

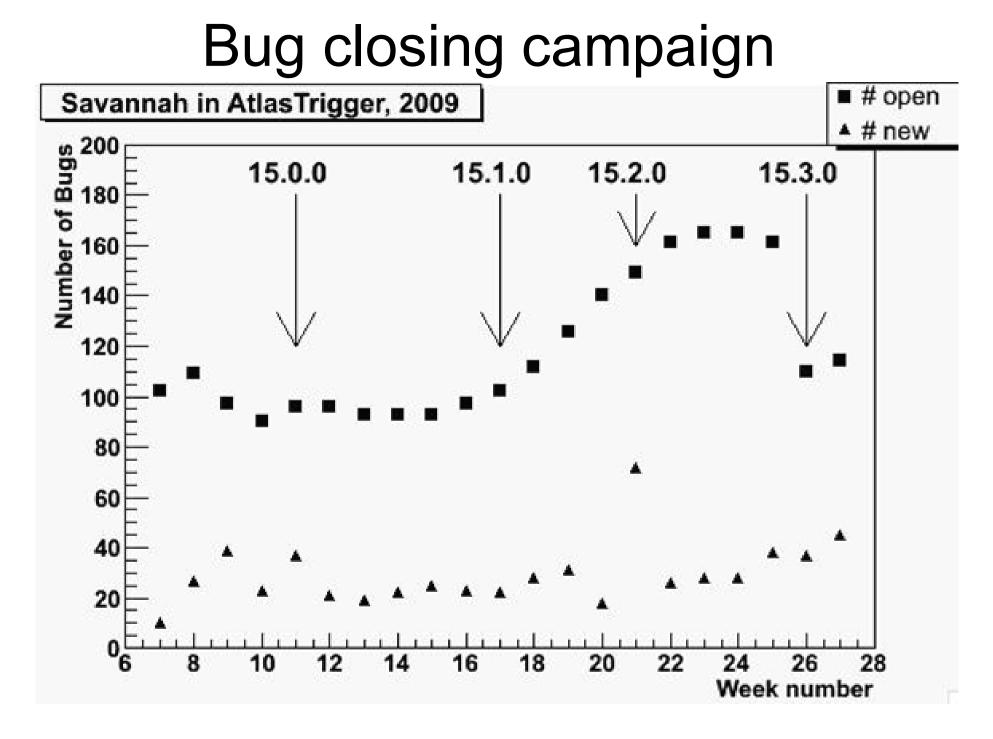

Based on https://twiki.cern.ch/twiki/bin/view/Atlas/TriggerWorkPlanRel15#Top_Level_Deliverables

Memory usage per domain (PMB)

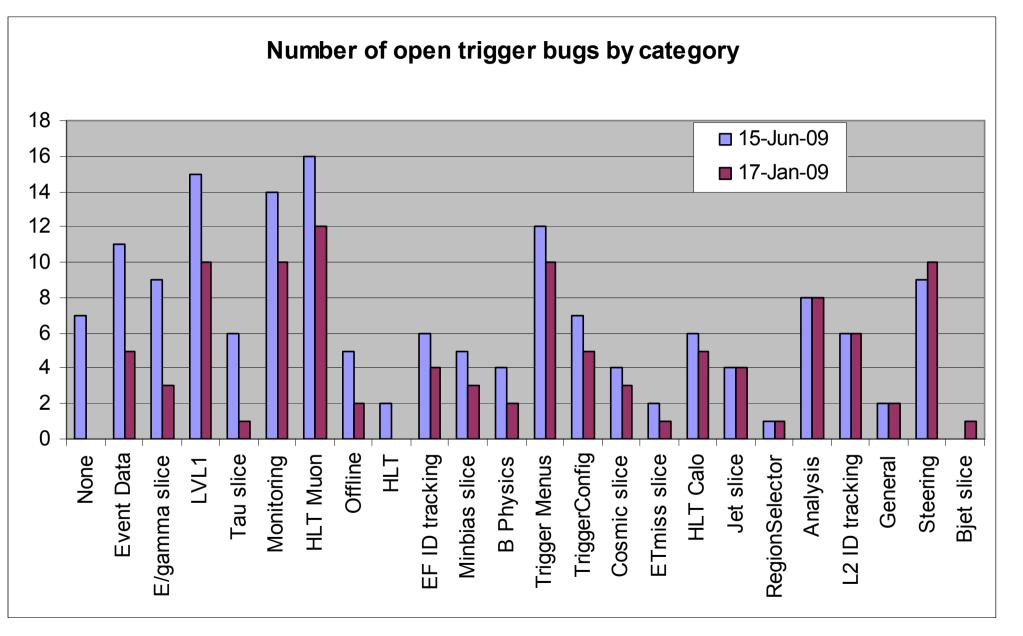

Memory and CPU in MC_lumi1E31_no_prescale RTT test

Bug closing campaign by slice

Core, rel & val – op & service tasks

- Operational tasks:
 - Release coordination (Simon, Dmitry)
 - Validation coordination (Ricardo, Monika)
 - Validation daily report shifts (several UK people)
 - Other contributions welcome
- Service tasks, e.g. for author qualification: <u>https://twiki.cern.ch/twiki/bin/view/Atlas/TriggerS</u> <u>erviceTasks</u>
